

Pancreas

That organ in the body, controlled by the Swadisthan, which when it malfunctions may result in diabetes (870500); Represented by Austria and Holland. The organ that makes the sugar, and is under the control of the left Nabhi (860921.2)

If you excite the right side Swadisthan... your left Nabhi catches. Say if you are a big thinker, a big planner... then what happens, you get diabetes... because you are using your right side Swadisthan too much... and because of that there is an effect on the left hand side Nabhi... your left side starts becoming weak... and makes your spleen and pancreas very weak... and that's why you get diabetes (790609.3)
